

Automation

Data Warehouse

Data Mart

Self-Service BI

Data Vault 2.0

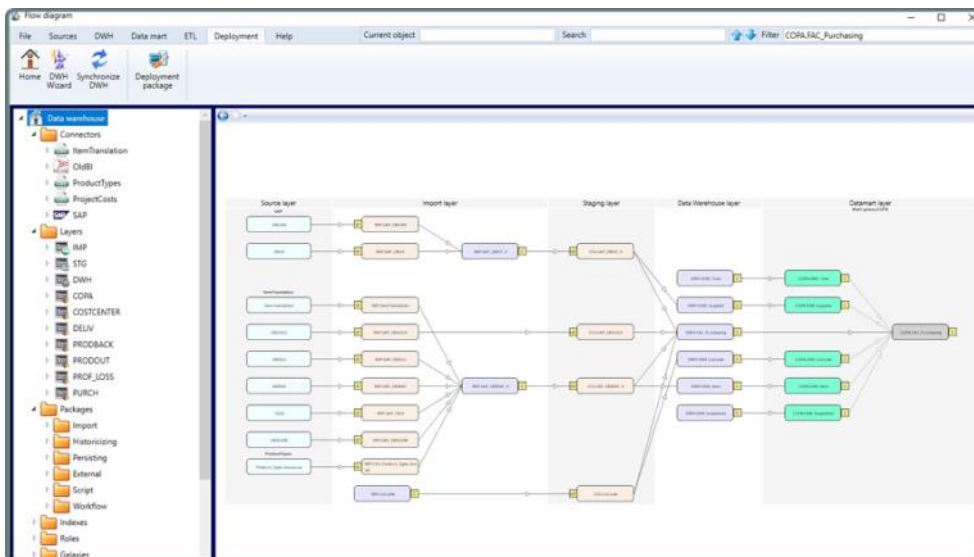

Full BI-Stack generating

Cloud & on-premise

Artificial Intelligence

Benefits

- Dramatically speed up time to market for BI applications
- Increase safety in your projects
- Reduce complexity of data management
- Reengineering of DWH/DM
- Agile approach support
- Easy to use

KEEP INDEPENDENT

- AnalyticsCreator ist a cloud or on-premise based software tool to design– create and maintain the live cycle process of data warehouse-, data mart- und BI- frontends.
- From the data source to the data warehouse to the frontend incl. ETL routes
- According to accredited scientific methods (Kimball, Data Vault 2.0, free modell)s
- Generating of code, PL/SQL, T-SQL, stored procedure
- Creation of MS Analysis Cubes, Tabular models, PowerPivot (Excel), Power BI, Tableau
- „best practices-wizard“, templates und meta-data connectors to source systems
- GDPR compliance, autom. documentation, data-lineage, deployment with change management
- Connection to any source systems (ERP, SAP, CRM, shop-solutions, ...)
- SAP/Theobald integration (deltaQ, tables,..), Templates for SAP
- Other data sources: Oracle, CSV, Excel, MS SQL, OleDB, ODBC, MS Dynamics, Nav., Axapta, ..
